

Distribution of Hybrid Coconut D × T (Mahuva) Seedlings

Schemes Details

Department	Agriculture, Farmers Welfare
Objective	The objective of this scheme is to promote high-yield Hybrid Coconut D × T (Mahuva) cultivation to increase coconut production and enhance farmers' income through the adoption of improved and quality planting material.

Purpose	To promote high-yielding coconut cultivation among farmers. To increase farmers' income through improved coconut varieties. To encourage scientific and modern horticulture practices. To improve coconut productivity in coastal and suitable agro-climatic regions.
Benefits	Farmers receive certified Hybrid Coconut D × T (Mahuva) seedlings. Higher nut yield and better quality coconuts compared to local varieties. Early bearing leads to quicker returns for farmers. Better resistance to pests and diseases. Long-term and sustainable income generation.
Eligibility	Applicant should be a farmer with agricultural land. Land should be suitable for coconut plantation. Applicant must follow recommended planting practices.
Documents Required	1. Aadhar card 2. 8A 3 mobile Number
